

# Are You Ready for CMMC Compliance?

## Preparing for Your CMMC Assessment *with* Sondhi Solutions

LET'S  
TOGETHER

All contractors working with the U.S. Department of Defense (DoD) will need a Cybersecurity Maturity Model Certification (CMMC) by 2025 to be able to bid for government contracts, but some contracts will require compliance as soon as this year.

### Partnering with Sondhi

Sondhi Solutions provides clients with advice, consulting and recommendations on how to meet and exceed CMMC compliance levels 1-5. To be a Registered Provider Organization (RPO), we have been trained by the CMMC-AB in CMMC methodology and are bound by the professional code of conduct.

While we meet all compliance requirements, we also specialize in driving change to improve clients' cybersecurity posture. CMMC is just one component of having a well-rounded security plan.

### Our Recommended Solutions

#### CMMC READINESS ASSESSMENT:

Sondhi will help you understand your security posture and whether or not your organization meets CMMC requirements. This assessment includes recommendations on meeting those requirements.

#### CMMC IMPLEMENTATION CONSULTING:

Our consultation includes all components of the readiness assessment, and we will work with your organization to implement those requirements.
